Introduction

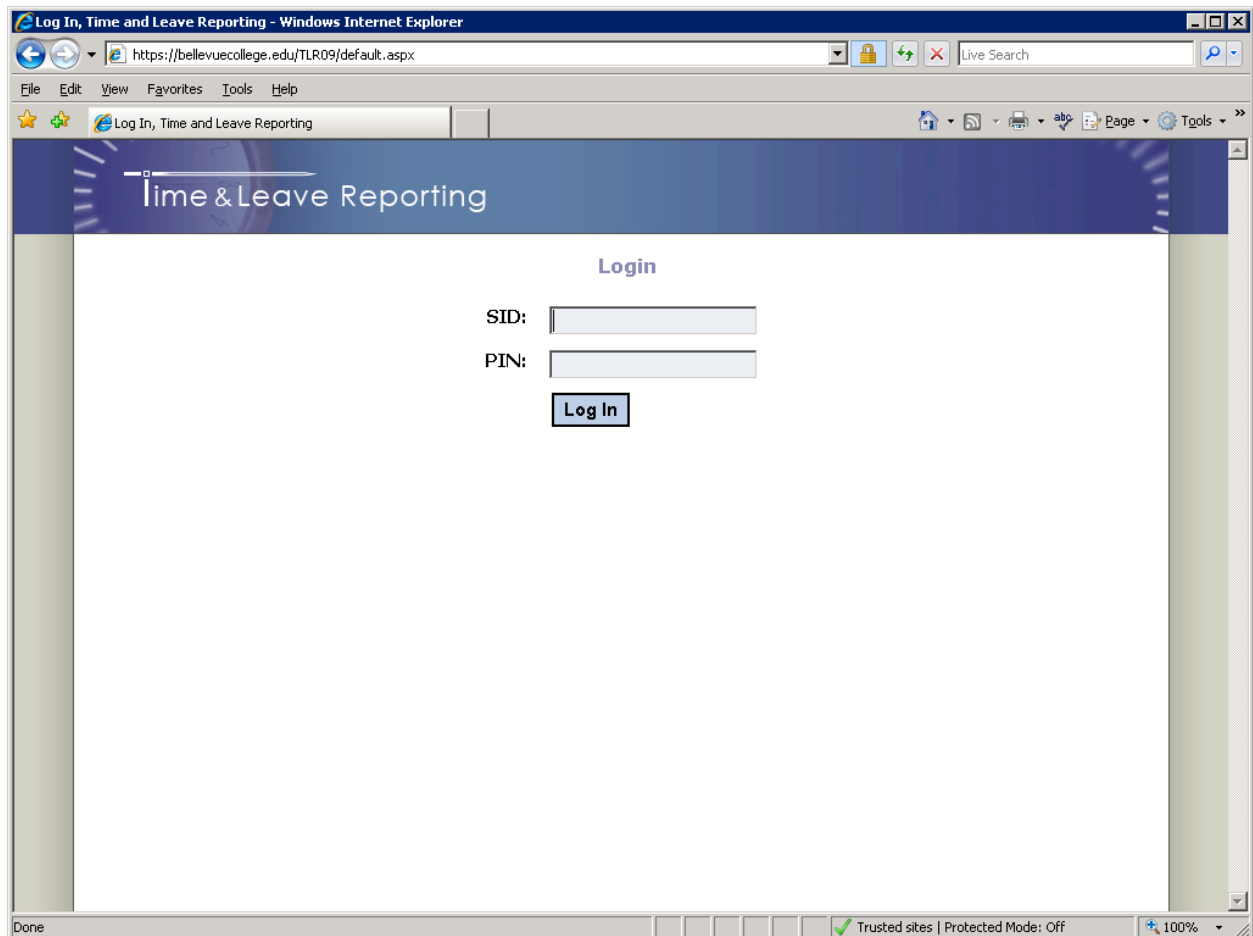

The Time and Leave Reporting (TLR) application is available to all hourly and student employees. TLR streamlines the process of reporting time.

TLR allows hourly and student employees to submit a timesheet and review past timesheets.

Login

Logon credentials required for TLR are employee System Identifier (SID) and Personal Identification Number (PIN) (**Figure 1**). If assistance with credentials is required, please contact the EdCC Human Resources department or Bellevue's Payroll department at 425-564-4270. Note, when entering a SID and PIN use digits (numbers) only.

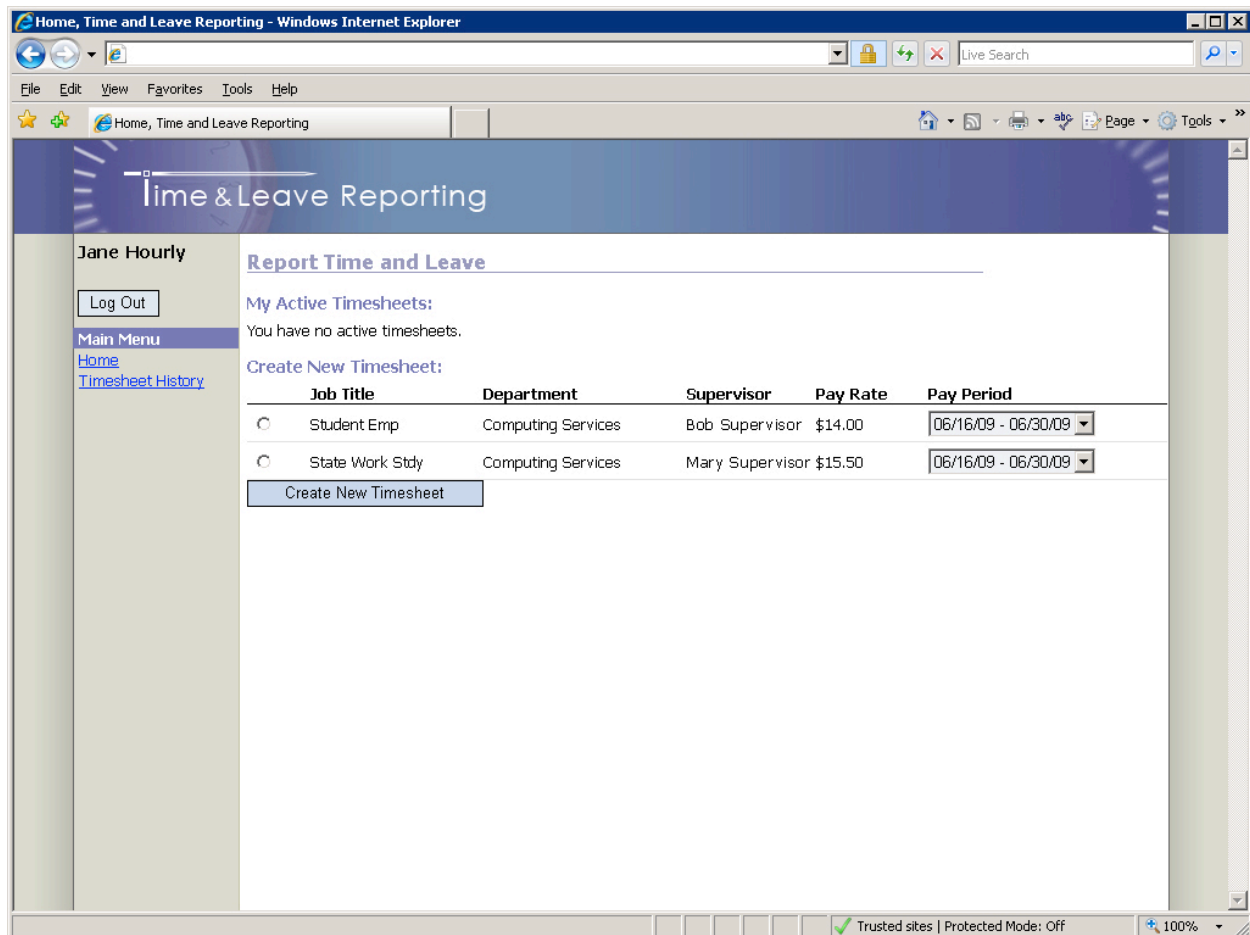

Figure 1 - Login Page

The screenshot shows a web browser window titled "Log In, Time and Leave Reporting - Windows Internet Explorer". The address bar displays the URL "https://bellevuecollege.edu/TLR09/default.aspx". The browser's menu bar includes "File", "Edit", "View", "Favorites", "Tools", and "Help". The toolbar shows various icons for navigation and search. The main content area features a blue header with the text "Time & Leave Reporting". Below the header, the word "Login" is centered. There are two input fields: "SID:" and "PIN:". Below these fields is a "Log In" button. The status bar at the bottom indicates "Done", "Trusted sites | Protected Mode: Off", and a zoom level of "100%".

After logging in, users will be taken to the Home page of the application (**Figure 2**).

Figure 2 – Home Page

The Home page is where employees are able to create new timesheets and also see the list of their active timesheets (those that have not been processed by payroll).

Creating a Timesheet

To create a timesheet, on the Home page (Refer to the “Create New Timesheet” section in **Figure 2**):

1. Select a job for which you are submitting a timesheet (if you have only one job in the list it will already be selected).
2. Select an appropriate pay period. You may choose a current, past, or future pay period.
3. Click the “Create Timesheet” button.

Once the “Create Timesheet” button is clicked you will be redirected to the timesheet page (**Figure 3**).
